# YOUR SEE WHAT THE STARS HAVE IN STORE FOR YOU IN JUNE horoscope

## GEMINI (MAY 22–JUNE 21)

With go-getter Mars in your sign until the 24th, you might be chomping at the bit to race ahead on a project. But to avoid confusion and miscommunication, wait until your ruling planet, expressive Mercury, resumes forward motion in Gemini on the 11th. A new moon alongside Mercury on the 16th brings news of a golden opportunity, so your keep your eyes and ears—and schedule—open.

### CANCER (June 22–July 22)

Lace up those trainers: A full moon in sporty Sagittarius gives you energy for a refreshed fitness regimen on the 2nd. But Saturn leaves your wellness house on the 14th, so you'll need some (healthy!) rewards to keep you motivated until mid-September, when it returns.

### LEO (July 23–Aug. 22)

On the 5th, Venus teams up with radiant Jupiter in Leo and makes you irresistible. And with Mars, Mercury and your ruler, the sun, in your social networking sphere, you're six degrees of separation from everyone and everything. Reach out to a person who can make a dream become a reality.

### VIRGO (Aug. 23–Sept. 22)

Be patient the first half of the month while your ruler, Mercury, is retrograde in your professional corner. But with the sun, energetic Mars and a new moon of fresh starts powering up your work life on the 16th, you'll have the resources to steer your career in any direction you want to go.

### LIBRA (Sept. 23–Oct. 23)

Bang out a work project before your ruler, creative Venus, leaves your professional sector on the 5th. When a new moon falls in your adventure zone on the 16th, you might tire of daily routines. Look for ways to stay stimulated, like taking a class, starting an art project or planning a getaway.

### SCORPIO (Oct. 24–Nov. 22)

Been procrastinating on a money matter? Tackle it during the full moon on the 2nd. On the 14th, structured Saturn backspins into Scorpio and offers you the chance to rectify something you thought you'd finished last December. This is a rare opportunity, so make it count!

### SAGITTARIUS (Nov. 23–Dec. 21)

You might find it easier to put your partner's needs before your own during the full moon in your relationship nook on the 2nd, but be sure to let your desires be known during the new moon on the 16th. That could help rekindle passion when Mars teams up with the sun on the 24th.

### CAPRICORN (Dec. 22–Jan. 20)

Hello, party girl! Your ruler, Saturn, backslides into Scorpio on the 14th, turning your summer into one extended celebration. Luckily, a new moon in your health corner helps you resist overindulging. And with Mars and the sun in your partnership zone on the 24th, you might never be alone!

### AQUARIUS (Jan. 21–Feb. 18)

With Mars, Mercury and the sun in your fifth house of passion and artistry, you're bubbling over with innovative ideas and might struggle to decide where to direct your energy. Things get clearer once Mercury resumes forward motion on the 11th and a new moon lands there on the 16th.

### PISCES (February 19–March 20)

Just as you start to get traction on an assignment, Saturn spins out of your professional corner and into your travel zone on the 14th. It could be hard to stay focused on work. This is a wonderful time to tap into your expansive imagination. How about a music, art or writing class?

### ARIES (March 21–April 20)

If you've been putting off an important obligation, do it around the 16th, when Mercury is back on track and a new moon melts your resistance. Once the sun joins your ruler, Mars, in your domain of domesticity, tackle a cluttered area or kick off a home improvement project.

### TAURUS (April 21–May 21)

Wait until Venus enters your domestic house on the 5th before starting a home improvement project. And you might as well wait a bit longer for thoughtful Mercury to turn direct in your money corner on the 11th. You'll be on your game—and more likely to find bargains.
